

Concordia University International Physical Education and Sports Symposium

TO BE CONDUCTED AS A PRELUDE TO AND IN CONJUNCTION WITH THE XXI OLYMPIAD

Loyola
Campus

The Dept. of Bio-Physical Education, Loyola Campus, Concordia University, will conduct an International Physical Education and Sports Symposium as a prelude to and in conjunction with the 1976 Olympic Games in Montreal. The format for the Concordia Symposium will include an extensive series of lectures, workshops and courses to be held during 1974, '75 and '76.

The opening event is scheduled for Friday night, Nov. 1, 1974 when Dr. Peter Kapustin of the University of Munich will speak on "The Effects of the 1972 Olympic Games on Physical Education and Sports in the Federal Republic of Germany". Dr. Kapustin's lecture will commence at 7:00 P.M. in Room 206 of the Bryan Building on the Loyola Campus. Dr. Kapustin is regarded as one of Germany's foremost physical education authorities. He is also affiliated with Loyola as a member of the international advisory council of The Institute of Comparative Physical Education, Evening Division and Summer School, Loyola Campus, Concordia University. Through the Institute, overseas courses of study for physical education teachers have been held in Germany, USSR, Belgium, Sweden, Finland and Denmark.

A panel discussion will be held following Dr. Kapustin's address. Joining him for the discussion period will be Dr. E.F. Enos, Chairman, Bio-Physical Education, Loyola Campus, Concordia University, and member of the Pastoral Committee for the '76 Games, Mr. Larry Eldridge, Mr. Vic Obeck and Mr. Frank Shaughnessy of the Organizing Committee of the 1976 Olympic Games.

Also on the 1974 segment of the Symposium's programme will be Prof. Sven Eklow, the Principal of the Swedish Federal College of Sport at Boson. Prof. Eklow was selected in 1972 to represent Sweden on the international advisory council of The Institute of Comparative Physical Education. His lecture is scheduled for 7 P.M. Friday, December 6th in the Bryan Building on the Loyola Campus. Prof. Eklow's address will deal with the development of Olympic athletes in Sweden's Mass Sport Participation Programme. Sub-topics include: "Is there a relationship or is the development of elite athletes an antithesis to the 'Sport for All' programmes?" Also to be discussed is the timely subject "Why is the 60-Year-Old Swede in Better Condition Than The 30-Year-Old Canadian?"

The first half of the 1975 Concordia University International Symposium on Physical Education and Sports schedule will be announced in early January, the second half in August and the complete 1976 programme in November of 1975.

The chief organizer of the Symposium is Dr. E.F. Enos. The aims of the Symposium are twofold: to promote an understanding of the Olympic movement and the significance of the 1976 Games and to use sport as a microcosm to examine contemporary man's physical, psychological and social being. According to Dr. Enos, "The work and research of the Dept. of Bio-Physical Education clearly indicates that the many dimensions of man and life are overt and concentrated in sport. A study of man through sport allows a wide variety of situations to be investigated".

Symposium opens: Friday, November 1, 1974.
7:00 P.M.,
Bryan Bldg., 206, Loyola Campus.

Lecturer: Dr. Peter Kapustin,
University of Munich.

Topic: "The Effects of the 1972 Olympic Games on
Physical Education and Sports in The
Federal Republic of Germany".
